Triage Reference Guide — Partnerships

Urgency Criteria

Urgency is driven by financial materiality and reporting deadlines. Large discrepancies close to month-end are critical.

Priority Scale (Commission_Impact)

- **> 2000:** URGENT — significant financial impact
- **500-2000:** ATTENTION — material impact, review today
- **100-499:** ROUTINE — standard processing
- **< 100:** LOW — minor, batch process

Categories

- **Commission Query**
- **Data Mismatch**
- **Onboarding Block**
- **Payment Delay**
- **Contract Question**

Status Values

- **Open**
- **In-Progress**
- **Resolved**
- **Escalated**

Escalation Rules

1. Any item categorised as URGENT that has been in queue for more than 24 hours
2. Multiple items from the same source or merchant (pattern indicates systemic issue)
3. Items with contradictory data (status says one thing, priority says another)
4. Items you cannot categorise with the information available

The 5 Failure Modes (check your output)

1. **Miscalculation** — Are the counts in your summary correct? Count manually.
2. **Misclassification** — Did the AI put ambiguous items in the right category?
3. **Hallucinated references** — Do any links, IDs, or cross-references actually exist?
4. **Overconfident language** — Does the output say "definitely" when it means "likely"?
5. **Missing context** — What do you know from experience that the data doesn't show?
